

Over the last seven years, Scott Walker and the Republican legislature have chipped away at Wisconsin's fair elections laws. They've changed our voting dates, kicked hundreds of thousands off our voting rolls, implemented Voter ID with no evidence of credible voter fraud, made intimidation at the polls easier and gerrymandered our legislative maps to secure their power.

We shouldn't be making it harder for Wisconsinites to vote; we should be making it easier! Wisconsin should be following the lead of states like Oregon that have automatic voter registration for their residents.

As Governor, Tony will work to make sure every single vote counts and increase opportunities for all Wisconsinites to participate in our democracy. [Read Tony's full "Government For Us" plan here.](#)
